

XD3

POWERED DESKTOP SPEAKER

PRODUCT OVERVIEW

FEATURES

- The perfect companion for your computer
- Compact size without “compact” sound
- Appearance matches laptops and LCD monitors
- Magnetically shielded to prevent interference
- Rich and natural sound of a real wood enclosure
- 3” woofer / 3/4” tweeter
- 15 watts per channel amp with built in crossover
- Perfect for music, gaming and media production

With over 50 years of speaker system know-how for concerts, movies, public address and clubs – when you want to recreate these experiences at home on the desktop – those that know turn to Cerwin-Vega!

When creating a speaker for desktop and computer applications the goal is to optimize the sound output while keeping the enclosure small. Clarity is critical, especially for those producing multimedia or analyzing tracks. Signal purity must be maintained by using low noise amplifiers that don’t disappoint when the volume is set to high. And, if it has the Cerwin-Vega! name, the bass has to be in-your-face.

Powered desktop speakers must also fully integrate with your entire sound system and outboard accessories. With the capability to handle multiple inputs, you can switch instantly between your computer as a source or other more portable platforms such as iPods, phones and other media players via the 1/8” stereo Auxiliary input. A convenient headphone jack allows you to “keep it down” while maintaining full control through the front panel power switch and volume adjustments.
