The frequency presets within any one frequency bank are intermodulation-free. These frequencies cannot be changed.

The frequency bank "U" allows the user to store individual frequencies which are freely selectable in 25-kHz steps. Therefore these frequencies may not be intermodulation-free.

Licences and licensing information can be obtained in the UK via Arqiva at www.pmse.co.uk

The frequency presets within any one frequency bank are intermodulation-free. These frequencies cannot be changed.

The frequency bank "U" allows the user to store individual frequencies which are freely selectable in 25-kHz steps. Therefore these frequencies may not be intermodulation-free.

Licences and licensing information can be obtained in the UK via Arqiva at www.pmse.co.uk

The frequency presets within any one frequency bank are intermodulation-free. These frequencies cannot be changed.

The frequency bank "U" allows the user to store individual frequencies which are freely selectable in 25-kHz steps. Therefore these frequencies may not be intermodulation-free.

Licences and licensing information can be obtained in the UK via Arqiva at www.pmse.co.uk

The frequency presets within any one frequency bank are intermodulation-free. These frequencies cannot be changed.

The frequency banks "U" (ew 100: bank "U", ew 300/ew 500: banks "U1"-"U6") allow the user to store individual frequencies which are freely selectable in 25-kHz steps. It might be that these frequencies are not intermodulation-free.

Frequencies between 566 - 606 MHz may be available on a Fixed Site Coordinated Licence. In the UK, frequencies between 606 MHz - 608 MHz require a Shared Ch.38 licence. For more details contact www.pmse.co.uk. N.B.: Range G covers only one quarter - 2MHz - of TV channel 38. For complete coverage of Channel 38 please use Range GB equipment.

Licences and licensing information can be obtained in the UK via Arqiva at www.pmse.co.uk

The frequency presets within any one frequency bank are intermodulation-free. These frequencies cannot be changed.

The frequency banks "U1"~"U6" allow the user to store individual frequencies which are freely selectable in 25-kHz steps. It might be that these frequencies are not intermodulation-free.

Licences and licensing information can be obtained in the UK via Arqiva at www.pmse.co.uk

The frequency presets within any one frequency bank are intermodulation-free. These frequencies cannot be changed.

The frequency banks "U1"- "U6" allow the user to store individual frequencies which are freely selectable in 25-kHz steps. It might be that these frequencies are not intermodulation-free.

From 01 January 2013 in the UK, only 863 MHz - 865 MHz is available. For more details contact www.pmse.co.uk

Licences and licensing information can be obtained in the UK via Arqiva at www.pmse.co.uk

The frequency presets within any one frequency bank are intermodulation-free. These frequencies cannot be changed.

The frequency banks "U1"-"U6" allow the user to store individual frequencies which are freely selectable in 25-kHz steps. It might be that these frequencies are not intermodulation-free.

Channels 31-37 - (600 MHz band) Ofcom has announced that new services will be launched in these channels but that PMSE will continue to have access. Longer term decisions about access to these channels will be made during the 2015 World Radio Conference. In the UK, frequencies between 606 MHz - 614 MHz require a Shared Ch.38 licence. In the UK, frequencies between 614 MHz - 626 MHz require a Fixed Site Coordinated Licence. For more details contact www.pmse.co.uk

Licences and licensing information can be obtained in the UK via Arqiva at www.pmse.co.uk

The frequency presets within any one frequency bank are intermodulation-free. These frequencies cannot be changed.

The frequency banks "U1"-"U6" allow the user to store individual frequencies which are freely selectable in 25-kHz steps. It might be that these frequencies are not intermodulation-free.

Licences and licensing information can be obtained in the UK via Arqiva at www.pmse.co.uk
